## Projects:

- **Minor Projects:**

- **Web Application to connect elder community**

Duration: 1month

**Guided By: Mr. Upendra Singh**

**Description:** Created a web application to support elderly individuals living alone by connecting them with NGOs. The platform allows users to view medical support services and upcoming events, and includes a chatbox for communication. NGOs can manage events, medical support, and respond to user queries, providing essential resources to the elderly community. The project focuses on simplicity and ease of use for older adults

**Role:** Full-Stack Development

**Technology Used:** EJS, NodeJs, Express, MongoDB

- **Major Projects:**

- **GroceryShopping Platform**

Duration: 3 Months

**Guided By:** Mr. Imran Ahmed Ansari

**Description:** I developed a grocery selling website for grocery shops either it be in big city or small city or town where I give the facility to the users to select the interested shop in there city and ordered the item list online and when items will get packed then they can pick the item from shop by making payment online or cash at the time of picking up the item this will save the time of user to go to the shop and list the items in the shop and wait for items to be packed and also help to the shopkeepers to make the presence of shop online.
